

Numerical Modeling of Crushed Salt

B. Lampe L. Paneru

Department of Civil Engineering
University of New Mexico

Computation Mechanics, Spring 2015

1 Motivation

- The Basic Problem That We Studied
- Previous Work

2 Our Results/Contribution

- Main Results
- Basic Ideas for Proofs/Implementations

- Basic Ideas for Proofs/Implementations

- Use Itemize a lot.
- Use very short sentences or short phrases.
- These overlays are created using the Pause style.

- Use Itemize a lot.
- Use very short sentences or short phrases.
- These overlays are created using the Pause style.

- Use Itemize a lot.
- Use very short sentences or short phrases.
- These overlays are created using the Pause style.

- You can also use overlay specifications to create overlays.
- This allows you to present things in any order.
- This is shown second.

- You can also use overlay specifications to create overlays.
- This allows you to present things in any order.
- This is shown second.

- You can also use overlay specifications to create overlays.
- This allows you to present things in any order.
- This is shown second.

- Untitled block.
- Shown on all slides.

Some Example Block Title

- $e^{i\pi} = -1$.
- $e^{i\pi/2} = i$.

- Main Results
- Basic Ideas for Proofs/Implementations

- The **first main message** of your talk in one or two lines.
 - The **second main message** of your talk in one or two lines.
 - Perhaps a **third message**, but not more than that.
-
- Outlook
 - What we have not done yet.
 - Even more stuff.
